SUMMARY

Software Engineer with 3.5+ years of experience, including 1 year of internship experience, building scalable web applications using JavaScript, React, Next.js, and Node.js. Strong foundation in Data Structures Algorithms, with hands-on experience designing RESTful services and optimizing application performance. Passionate about solving complex problems, building reliable systems, and contributing to scalable architectures.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, SQL
Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Material UI (MUI), Bootstrap
Backend: Node.js, Express.js, REST APIs, MongoDB, MySQL, Stripe (Payment Integration)
Cloud & Monitoring: AWS (EC2, S3, CloudWatch), Sentry
Tools: Git, GitHub, Postman, Jira, Monday.com, VS Code
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Performance Optimization

PROFESSIONAL EXPERIENCE

BestPeers InfoSystem (Client-Based), Indore, India: Full Stack Developer (MERN) Apr 2026 – Present

- Develop and maintain scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js for client projects.
- Built 20+ reusable React.js components and integrated RESTful APIs, reducing frontend development time by 25% through modular, data-driven architecture
- Deploy and host applications on AWS EC2, use Amazon S3 for file storage, and monitor application health using AWS CloudWatch.
- Used Sentry for real-time error tracking, cutting average production bug resolution time by 30%
- Collaborate with backend, QA, and client teams to deliver features within sprint timelines while following Git-based version control and code review practices.

ScaleUs Technologies (Product-Based), Indore, India: MERN Stack Developer May 2025 – March 2026

- Developed and maintained scalable product features using MongoDB, Express.js, React.js, and Node.js.
- Built reusable React.js components and implemented state management for complex, data-driven interfaces.
- Integrated REST APIs in collaboration with backend teams to deliver dynamic, real-time product functionality.
- Improved application performance and responsiveness across devices and browsers.
- Worked in an Agile environment, contributing to code reviews, testing, and iterative product releases.

Impulse Websystem (UK Client-Based), Indore, India: MERN Stack Developer Jun 2024 – Apr 2025

- Built 10+ responsive, mobile-first web applications using React.js, JavaScript, HTML5, and CSS3, achieving 100% cross-device compatibility
- Translated UI/UX designs into clean, maintainable, production-ready code.
- Integrated frontend applications with Node.js and Express.js REST APIs backed by MongoDB.
- Collaborated with cross-functional teams to deliver multiple web applications for UK-based clients.

Amenses Innovation, Indore, India: MERN Stack Developer Intern Feb 2023 – May 2024

- Gained hands-on experience in full stack development using MongoDB, Express.js, React.js, and Node.js.
- Assisted with debugging, testing, and version control (Git) while following Agile workflows.

PROJECTS

EQL global , Financial Research Platform for Professional Investors April 2026 – September 2026

- Built and maintained core product surfaces — including the interactive workspace, document viewer, table modules, audio/recordings feature, and company research pages — for a financial research platform used by institutional clients including HSBC and major Norwegian banks, using Next.js 16 (App Router), React 19, and TypeScript
- Implemented end-to-end billing with Stripe (checkout, customer portal, webhooks) and JWT-based authentication (login, registration, password reset) securing access for institutional/professional investor accounts
- Raised code quality and delivery speed using strict-mode TypeScript, Redux Toolkit, React Hook Form + Zod validation, and Husky/lint-staged pre-commit hooks (ESLint, Prettier, tsc), reducing production bugs by 50%

Asset Management Portal –Enterprise Web Application August 2025 – November 2025

- Designed and developed a full-stack asset management system with secure authentication, role-based access control (RBAC), and license-key validation.
- Implemented subscription-based SaaS architecture with payment gateway integration, automated key generation, and email notifications.
- Built RESTful APIs using Node.js and MongoDB to manage assets, users, subscriptions, and audit logs.
- Optimized application performance, data validation, and security using server-side authorization and API-level access controls.

Scale Scanner — OCR-Based SaaS Product June 2025 – September 2025

- Developed a full-stack OCR-powered visiting card scanner to extract printed and handwritten text using image processing and text recognition.
- Built a SaaS dashboard enabling users to scan, store, search, and export contact data to Excel and vCard formats.
- Integrated subscription plans, payment gateway, and user lifecycle management with secure authentication.
- Implemented cloud-based data storage, validation, and role-based access control to ensure data security, scalability, and multi-tenant support.

SketchWow - Ecommerce Website for Flowcharts June 2024 – September 2024

- Developed a responsive Next.js/React.js website from provided UI designs, converting complex layouts into reusable and scalable frontend components.
- Implemented responsive UI across multiple screen sizes with reusable components, optimized layouts, and consistent styling.
- Improved frontend performance and maintainability through component reusability, optimized assets, and Next.js rendering best practices.

EDUCATION

Master Of Computer Application (MCA) July 2024 – April 2026
7.5 GPA
Chameli Devi Group of Institutions

HONORS AND CERTIFICATIONS

- Excellence Certificate, ScaleUs Technologies — Awarded for outstanding performance and contribution to frontend development projects.
- Certificate of Completion, Unacademy — Data Structures & Algorithms using Java.
- Problem Solving Achievement — Solved 200+ Data Structures & Algorithms problems on LeetCode using Java and JavaScript.
